BIOMETRIKA

A JOURNAL FOR THE STATISTICAL STUDY OF BIOLOGICAL PROBLEMS

FOUNDED BY

W. F. R. WELDON, FRANCIS GALTON AND KARL PEARSON

EDITED BY

EGON S. PEARSON

IN CONSULTATION WITH

HARALD CRAMÉR — J. B. S. HALDANE

R. C. GEARY — G. M. MORANT

MAJOR GREENWOOD — JOHN WISHART

VOLUME XXXII

1941—1942

ISSUED BY THE BIOMETRIKA OFFICE
UNIVERSITY COLLEGE, LONDON
AND PRINTED AT THE
UNIVERSITY PRESS, CAMBRIDGE

PRINTED IN GREAT BRITAIN

CONTENTS OF VOLUME XXXII

Memoirs

		PAGES
I.	A Theory of Randomness. By M. G. KENDALL	1—15
II.	A Geometrical Analysis of the Frequency Distribution of the Ratio between two Variables. By C. NICHOLSON. With four Figures in the Text	16—28
III.	The Statistical Significance of Canonical Correlations: By M. S. BARTLETT	29—37
IV.	On the Limiting Distribution of the Canonical Correlations. By P. L. HSU	38—45
V.	The Application of Maximum Likelihood to Dosage-mortality Curves. By F. GARWOOD	46—58
VI.	A Note on further Properties of Statistical Tests. By E. S. PEARSON	59—61
VII.	Analysis of Variance from the Power Function Standpoint. By P. L. HSU	62—69
VIII.	On an Optimum Property of two Important Statistical Tests. By J. B. SIMAIKA	70—80
IX.	The Laws of Chance in Relation to Thought and Conduct. An Introductory Lecture delivered by KARL PEARSON in 1892	89—100
X.	Medical Statistics from Graunt to Farr. Part I. By MAJOR GREENWOOD	101—127
XI.	Fiducial Argument and the Theory of Confidence Intervals. By J. NEYMAN	128—150
XII.	Tables of Percentage Points of the Incomplete Beta Function. Computed by CATHERINE M. THOMPSON:	
	Prefatory Note. By E. S. PEARSON	151—153
	Description of the Calculation and Methods of Interpolation. By L. J. COMRIE and H. O. HARTLEY	154—167
	Tables	168—181

UNIVERSITY OF UTAH LIBRARIES

PAGES

XIII. Table of Lagrangian Coefficients for Harmonic Interpolation in certain Tables of Percentage Points. Prepared by L. J. COMRIE and H. O. HARTLEY . . . . . 183—186

XIV. Table of Percentage Points of the χ^2 Distribution. Calculated by CATHERINE M. THOMPSON . . . . . 187—191

XV. Medical Statistics from Graunt to Farr. Part II. By MAJOR GREENWOOD . . . . . 203—225

XVI. Moments of the Distributions of Powers and Products of Normal Variates. By J. B. S. HALDANE . . . . 226—242

XVII. The Transformation of Data from Entomological Field Experiments so that the Analysis of Variance becomes Applicable. By GEOFFREY BEALL. With three Figures in the Text . . . . . 243—262

XVIII. Interpolation for Fresh Probability Levels between the Standard Table Levels of a Function. By J. B. SIMAIKA. With four Figures in the Text . . . . . 263—276

XIX. Partial Rank Correlation. By M. G. KENDALL . . 277—283

XX. Inequalities for Multivariate Frequency Distributions. By C. E. V. LESER. With one Figure in the Text . . 284—293

XXI. The Mode and Median of a nearly Normal Distribution with given Cumulants. By J. B. S. HALDANE . . . 294—299

XXII. Table of Percentage Points of the t-distribution. By MAXINE MERRINGTON 300

XXIII. The Probability Integral of the Range in Samples of n Observations from a Normal Population:

I. Foreword and Tables. By E. S. PEARSON . . . 301—308

II. Numerical Evaluation of the Probability Integral. By H. O. HARTLEY . . . . . 309—310

XXIV. Notes on Testing Statistical Hypotheses. By E. S. PEARSON. With two Figures in the Text . . . . . 311—316

XXV. Simple Tests for Given Hypotheses. By E. J. GUMBEL. With one Figure in the Text . . . . . 317—333

XXVI. The Range in Random Samples. By H. O. HARTLEY . 334—348

Miscellanea

		PAGES
(i)	A Recurrence Relation for the Semi-invariants of Pearson Curves. By M. G. KENDALL	81—82
(ii)	A Comparison of Annual and Biennial Inflorescences of *Daucus Carota* (wild carrot). By W. D. BATEN . .	82—87
(iii)	Review of HAROLD JEFFREYS' *Theory of Probability*. By S. S. WILKS	192—194
(iv)	Review of WILTON M. KROGMAN'S *A Bibliography of Human Morphology*, 1914–1939	194
(v)	A Property of the Distribution of Extremes. By H. E. DANIELS	194—195
(vi)	Proof of Relations Connected with the Tetrachoric Series and its Generalization. By M. G. KENDALL . .	196—198
(vii)	The Cumulants of the Distribution of the Square of a Variate. By J. B. S. HALDANE	199—200
(viii)	Numerical Approximations to the Percentage Points of the χ^2 Distribution. By MAXINE MERRINGTON . .	200—202
(ix)	Review of *The Second Yearbook of Research and Statistical Methodology Books and Reviews*, edited by OSCAR KRISEN BUROS	349—350
